

## upcycling

Recycled objects can often have an unfinished, homemade and second-hand aesthetic. Upcycling is the gain in value or quality of a recycled object. Examples of upcycled objects include, bags made from recycled crisp packets and the 'tranSglass' [1997] series by Emma Woffenden and Tord Boontje, where they raised the value of empty wine bottles by creating vases, candle holders and drinking glasses. {March 2012}
